C-24 Four Door Access Controller
Introduction

C24 four door access control board is a new generation of intelligent network access control products. It uses super network processor and mass memory to realize real network data exchange, high-speed data operation and super large user data management.

Product Parameters

- Working Voltage: DC9V-14V
- Working Current: < 300mA
- Temperature: 0°C-70°C
- Humidity: 10-90%RH
- Door Control: 4
- Readers: 8
- Exit Button: 4 group
- Door Sensor Interface: 4 group
- Relay: 4 group
- Alarm Extension: 4 input and 4 output (fire alarm, Probe alarm, burglar alarm, Gas alarm)
- Reading Protocol: Wiegand 26 \ Wiegand 34 \ Wiegand 66
- Register cards: 42,000
- Record Capacity: 2,000,000
- Communication Type: TCP/IP
Communication Distance: TCP/IP (100 mtr)
Wiegand: 80 mtr
Size: 212*130*20 mm

**Wiring Connection**
